suzie buchholz

Suzie grew up in the heart of Kansas, where things were made by hand, meals were hearty and people made do with what they had. Deeply rooted in the pragmatic and practical, and fueled by her dad's instructions to "always ask questions," Suzie's artwork gleefully deconstructs modern life. The results are bold and surprising interpretations, in paintings and found object sculptures, that could only come from a wayward Kansas girl turned Californian.

Suzie studied painting in Aix-en-Provence, France, and received a BFA from San Francisco Art Institute.
